

Practice 3

1. Problem 1: Registration.html

- Guide Problem 6 -Practice 3 (English Form): Create a form tag with the following attributes: action="#" name="dangky" method="post"
- Use the fieldset tag combined with the legend tag to create borders and text surrounding groups.

```
<fieldset>
  <legend><b>Personal information</b></legend>
  ...
</fieldset>
```

- Use the input tag with the type="text" attribute to create input boxes for First and Last Name, Year of Birth, Username. Add the required attribute to the Username box.
- Use the input tag with the type="submit" attribute to create the Login button and type="reset" to create the Cancel button.
- Use the textarea tag to create an input cell for Address.
- Use the select tag to create input cells for Day and Month:

```
<select name="Now">
  < option value="01" selected>01</option>
  < option value="02">02</option>
  ...
</select>
```

MEMBER REGISTRATION

Personal information

Full name:

Birthday: Month Year

Gender: ☒ Nam ☐ Nữ

Address:

Telephone:

Email:

Credentials

Username:

Password:

Confirm password:

2. Problem 2: Right.html

- Use marquee tags and set attributes `direction="up"` `scrollamount="3"` `scrolldelay="100"` `onMouseMove="stop()"` `onMouseOut="start()"` to move content in the high-selling book section. Use `p`, `img`, and `a` tags to create content in marquee tags:

```
<marquee direction="up" scrollamount="3" scrolldelay="100"
onMouseMove="stop()" onMouseOut="start()">
  <p><a href="#"> English For
Tech</a></p>
</marquee>
<!--Insert 3 more books-->
```

- In the content of the website link, use the select tag in combination with attributes to link to the corresponding website: <https://lib.eiu.edu.vn/> - Eastern International University; <https://eiu.edu.vn/>-Eastern International University

3. Problem 3: Header.html

- Using div tags stipulates two blocks: block 1 contains the logo, block 2 contains links.
- Login Links, Registration links to Login.html in Problem 5 (Practice 2); Registration.html in Problem 1-Practice 3; Link Cart sets the link null.
- Insert icon with keyword: user, cart
- Link CSS:

<https://stackpath.bootstrapcdn.com/font-awesome/4.7.0/css/font-awesome.min.css>

- Link Icon list: <https://fontawesome.com/v4.7.0/icons/>

4. Problem 4. Nav.html

Create a Nav.html page.

- Use the ul tag to create a list of links to pages in Problem 4 -Practice 1, Problem 5-Practice 3 and an empty link (Contact).
- Use div tags containing content in Search. Using tag input/ type = “submit”

- [Introduction](#)
- [Contact](#)

5. Problem 5. Homepage.html

Homepage include homepage.pdf

Design a home page following the guide:

```
<!doctype html>
<html>
<head>
<meta charset="utf-8">
<title>ABC BookStore</title>
</head>
<body>
  <header>
    Contains the content of the header of the page (Header.html)
  </header>

  <nav>
```

Contains horizontal navigation menu (Nav.html)

```
</nav>
<div> <!-- Rules on the body of the page -->
  <article>
    <aside>
      Contains content on the left side of the page (Left.html)
    </aside>

    <section>
      Contains content in the middle of the page (Product.html)
    </section>

    <aside>
      Contains content on the right side of the page (Right.html)
    </aside>
  </article>
</div>
<footer>
  Contains the footer content
</footer>
</body>
</html>
```

6. Problem 6. CSS

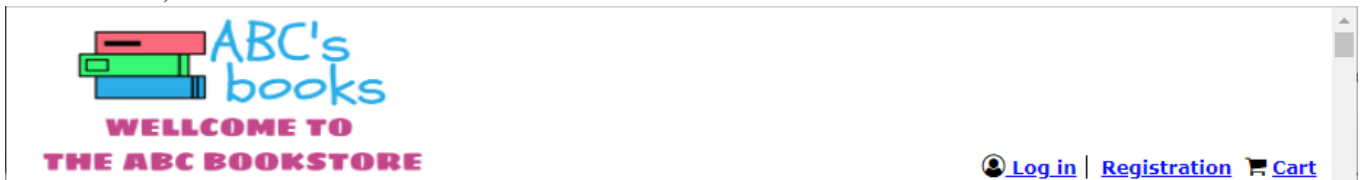

Reference: https://hocwebchuan.com/tutorial/tut_css_combine.php

- Let's create a Style.css file in the Script folder and insert it into the Homepage.html in problem 5 to format this page:
`<link rel="stylesheet" href=".....">`
- To avoid default gaps between browser-generated tags, it is necessary to set the margin and padding attributes to 0px for all tags:

```
*{ margin:0px;
padding:0px;
}
```

a) Header Format

Guide:

- Specify the width of the header tag and displayed in the middle of the browser.
- The format for the logo image is shown on the left and the Login and Registration sections,... shown on the right.
- Set the property to change the text color when hovering over links:

```
header div#dn a:hover{
color:#900;
}
```

b) Nav section format

- The background color format for the nav tag, the width of this tag varies with the browser width, the content is displayed in the middle.
- Specify the ul tag displayed on the left and the div tag containing the search content displayed on the right.
- The contents of the li card will appear underlined when the mouse is inserted.
